Subject: RE: PCB source tracing report - Full draft for review

Hello - I'm sending a reminder that the deadline is tomorrow (Wednesday) for your comments on the PCB source tracing report. I'm willing to receive your comments on OneDrive, as a separate comment document, or in redline from a pickup site if you have one.

Please notify me if you expect you will not be able to send your comments by COB tomorrow. Also, if you have any technical difficulties accessing or editing the file, please let me know.

Thank you,

Jenée Colton

Subject: PCB source tracing report - Full draft for review

Hello All - We have a full draft of the report "*A Review of Select PCB Source Tracing Programs*" posted for your review at both a OneDrive (Sharepoint) and FTP pickup site. **You should have received an email from the Microsoft Online Services Team with a OneDrive link to the report.** You can make comments online (Use the Edit Online mode) or print the report and email your comments. As backup, I am also posting the report in Word and pdf at our King County FTP site. You can download the document here but note the file is too big to email back to me with your redline edits.

<ftp://ftpgreen.kingcounty.gov/transfer/colton>

Please provide your feedback by **April 20th**.

Some of you may only be interested/able to provide review of the sections that apply to your program, but if you are also able to review the Summary of Programs (Section 4.3) and Challenges with PCB source tracing (Section 6) at a minimum, it would be very helpful.

We did our best to address all your comments on Section 4 but we have made significant changes so please review and make sure the new text is accurate. FYI - We are waiting to do fine tuning of document formatting (e.g., # of spaces after periods, returns at the end of sections) until after this round of review.

Reminder: the purpose of this report is to share knowledge on source tracing methods amongst each other and provide a reference for others.

If you have trouble accessing the report, please let me know.

Thank you for all your assistance,

Jenée Colton
